

N.Y.C.

onis

N.Y.C. This heritage glass design was inspired by America's first fine handcrafted glass. Originally created by the designer Edwin W Furst, in the art deco era and post war transformation, where people began to revive and refocus on the new world. Making N.Y.C. an iconic, and meaningful range.

- A modern vintage-inspired design, crafted to meet the needs of today's bar menus and the expectations of modern customers.
- Features stunning pillar stems and tumblers with a distinctive ridge-styled base, drawing inspiration from the iconic Empire State and Chrysler buildings.
- The stemware range includes five cocktail shapes, all backed by the Onis Rim Guarantee for lasting quality.
- All tumblers are made with Onis XtraTuff® technology – a super-strengthening heat treatment that enhances durability and prolongs service life.
